

Nishant Sharma

B.Tech Information Technology | Software Engineering | AI/ML

+91 9317404725 nishant.1511977@gmail.com

LinkedIn | GitHub | Portfolio

PROFILE

B.Tech Information Technology student with hands-on experience in Python, Machine Learning, backend development, databases, and real-time web applications. Strong foundation in Data Structures and Algorithms, Object-Oriented Programming, DBMS, Operating Systems, and Computer Networks. Experienced in building ML models and full-stack applications using Flask, JavaScript, MongoDB, and SQLite. Seeking software engineering, backend, or AI/ML internship and entry-level opportunities.

EDUCATION

UIT, Himachal Pradesh University, Shimla

B.Tech in Information Technology

CGPA: 8.3/10

2023 – 2027

RELEVANT COURSEWORK

Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

Online Coursework: Stanford University – CS109: Probability for Computer Scientists; Machine Learning – Coursera / DeepLearning.AI

TECHNICAL SKILLS

Programming Languages:	Python, Java
AI / Machine Learning:	Supervised Learning, Unsupervised Learning, Classification, Regression, Data Pre-processing, Random Forest, Scikit-learn, TensorFlow
Data & Scientific Computing:	NumPy, Pandas
Backend & APIs:	Flask, Flask-SocketIO, REST APIs
Databases:	SQL, MongoDB, SQLite
Web Development:	HTML5, CSS3, JavaScript
Tools:	Git, GitHub, VS Code, Jupyter Notebook

PROJECTS

SENTO – Watch Party & Room Chat

Python, Flask-SocketIO, MongoDB, JavaScript

- Built a real-time watch-party application supporting shared rooms, video watching, and multi-user chat.
- Implemented WebSocket-based communication using Flask-SocketIO and integrated MongoDB for application data.
- Live Demo

ScriptLab – Online Script Writing Platform

HTML, CSS, JavaScript

- Developed a web application where users can write, edit, and manage scripts online.
- Designed an interactive browser-based writing experience for creating and organizing scripts.
- Live Demo

Twishii – Letter & Note Writing Website

HTML, CSS, JavaScript

- Built a web application for writing personal letters and notes through a simple web interface.
- Designed the application with a clean and user-friendly writing experience.
- Live Demo

PinkChat – Real-Time Chat Application

Python, Flask-SocketIO, MongoDB, JavaScript

- Built a real-time communication application supporting multi-user chat rooms and event-driven messaging.
- Implemented WebSocket-based communication using Flask-SocketIO for real-time message transmission.
- Integrated MongoDB for storing and managing application data.

Crop Prediction System

Python, Scikit-learn, Pandas, Flask

- Developed a machine learning system to predict suitable crops using agricultural and environmental input features.
- Implemented data preprocessing and trained a Random Forest classification model using Scikit-learn.
- Integrated the trained model with a Flask backend to provide predictions through a web interface.

AI-HR Analyzer

Python, Flask, NLP, Scikit-learn, PDF Processing, HTML, CSS

- Built a Python-Flask based AI HR recruitment system that analyzes resumes and matches candidates with job requirements.
- Implemented PDF text extraction and NLP-based resume matching using TF-IDF and cosine similarity.
- Developed a web interface to upload resumes, process candidate information, and generate relevance scores for job descriptions.
- Live Demo

CERTIFICATIONS

- Machine Learning – Coursera / DeepLearning.AI / Machine Learning – Stanford University
- AI Innovation Bootcamp – NIT Hamirpur
- Technical Bootcamp – CDAC Mohali
- Campus Recruitment Training – NIIT Foundation / Infosys

AREAS OF INTEREST

Software Engineering, Backend Development, Artificial Intelligence, Machine Learning, Autonomous Systems
